

Maxpro *PowerCube* Hydrostatic Test Unit

The Maxpro *PowerCube* is designed for quick, convenient, and accurate hydrostatic testing on the spot. It features large dual pumps, no-nonsense control panel, and high flow, all in a rugged stainless compact design at low cost. All that's needed is a compressed air supply and water source, and testing that ***"has to get done right now."***

Features:

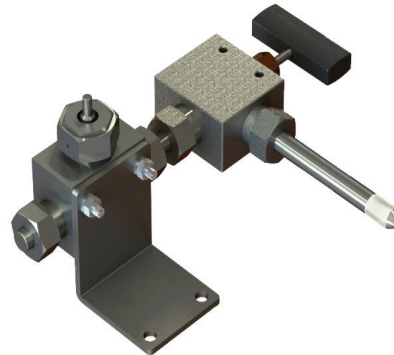

- Rugged stainless steel frame and panel
- Dual stainless steel pumps equally share testing workload, extending the life of the pumps and seals
- Low pressure/high flow pump
- High pressure top off final pressure pump
- Dedicated ball valve on each pump, allowing precise pressure control and preventing pressure 'undershooting' or 'overshooting'
- Wide pressure range 1,000-30,000 psi
- High flow stainless steel outlet plumbing
- Easy to use control panel with schematic
- Portable at 115 pounds!
- Full size water filtration package with shut-off
- Full size air filtration for added reliability
- Pressure port for auxiliary pressure devices

Dimensions:

- Height: 20"
- Depth: 18"
- Width: 17"

Optional Accessories:

- Isolation valve package
- Pressure logger/110V/60Hz
- Circular chart recorder
- Reservoir
- Hoses, QD's, adapters
