

Tools & Installation

MAXIMATOR offers manual Coning and Threading tools that are designed to prepare accurate tubing ends to accept the medium, high and ultra high pressure connections.

Tools & Installation feature:

- ▶ Manual Coning and Threading Coning tools are designed to thread up to 9/16" OD tubing.
- ▶ One size Coning and Threading tool with interchangeable bushings and thread dies eliminates multiple tool inventories.
- ▶ Internal needle bearings and high strength materials offers ease of operation and extended tool life.
- ▶ Coning blades are designed to cut both the angle and straight areas to insure good concentricity between the sealing surfaces.
- ▶ Precision Reseating Tools to repair damaged female high pressure connections without full disassembly of components.

MAXPRO offers a complete line of manual tools for the proper preparation of medium, high and ultra high pressure connections to 9/16" OD tubing. For complete coning and threading instructions see Maxpro's website at www.maxprotech.com.

Note: When selecting multiple items, the pressure rating would be that of the lowest rated component.

See page 8 for our new Coning and Threading Machine where single ended operation is only one of many state of the art features.

See our Coning and Threading machine video at www.maxprotech.com.

Coning and Threading Tools

MAXIMATOR offers tools for coning and threading tubing up to 9/16" O.D. These are precise tools that allow manual coning and threading of medium, high, and ultra high pressure tubing. Please refer to the Maxpro Technologies website, www.maxprotech.com, and click on the VFT button to find detailed instructions for the coning and threading process.

Coning Tools

The coning tool comes complete with blades, collet and tools. The blades and tool feed nut allow the user to control the cutting feed rate and face the end of the tube when complete. The blades and collet can be changed for other sizes, while using the same base tool.

Tubing Size O.D. x I.D. (in.)	Tubing Pressure (psi @ R.T.)	Connection Type	Coning Tool Complete Catalog Number	Replacement Part Information	
				Collet Part Number	Coning Blades Set (Qty. 2) Part Number
1/4 x .109	22,500	4MM	CT4M	3781.1009	3781.1014
3/8 x .203	22,500	6MM	CT6M	3781.1010	3781.1013
9/16 x .312	22,500	9MM	CT9M	3781.1011	3781.1012

1/4 x .083	65,000/101,000	4HM/4UM	CT4H	3781.1009	3781.0843
3/8 x .125	65,000/101,000	6HM/6UM	CT6H	3781.1010	3781.1017
9/16 x .188	65,000	9HM	CT9H	3781.1011	3781.1016
5/16 x .062	152,000	5UM	CT5U	3781.0846	3781.0843

Threading Tools

The threading tool comes complete with the threading die and bushing. The thread is a left hand type. The thread die and bushing can be changed for other sizes, while using the same base tool.

Tubing Size O.D. x I.D. (in.)	Tubing Pressure (psi @ R.T.)	Connection Type	Left Hand Thread Size (UNF class 2)	Threading Tool Complete Catalog Number	Replacement Part Information	
					Die Part Number	Bushing Part Number
1/4 x .109	22,500	4MM	1/4-28	TT4	3781.0584	3781.1055
3/8 x .203	22,500	6MM	3/8-24	TT6	3781.0582	3781.1053

Note: For complete coning and threading tool kits, see page 7.

Reseating Tools

The reseating tool is designed to rework an existing damaged coned and threaded connection without full disassembly of the component. The reseating tool will resurface the sealing surfaces of the medium, high, and ultra high pressure connections up to 9/16" tubing.

Tubing Size O.D. x I.D. (in.)	Tubing Pressure (psi @ R.T.)	Connection Type	Reseating Tool Complete Catalog Number	Replacement Part Information		
				Cutter Part Number	Bushing Part Number	Gland Part Number

Assembly of Standard Coned & Threaded Connections

Assembly Instructions:

1. Insert the gland onto the tubing. Thread the left handed collar onto the tube until one or two threads are exposed from the tapered coned end.
2. Apply a compatible lubricant to the gland threads and the back side of the collar where it comes in contact with the gland. Also lubricate the tapered cone portion of the tube with a system compatible lubricant. This will help protect the sealing surfaces from galling during the assembly process.
3. Insert the tubing into the connection and tighten the assembly hand tight. Then use a torque wrench to tighten the connection to the appropriate value in the table below. It is good practice to use an additional wrench to prevent the opposite connection from turning.

Assembly of Anti-Vibration Collet Gland Connections

Assembly Instructions

1. The High Pressure Anti-Vibration Collet Gland Assembly can be installed using the same procedure as the standard coned and threaded connection. (see above steps 1 through 3) The high pressure collet grips the tube when the connection gland is tightened.
2. When using the Medium Pressure Anti-Vibration Collet Assembly, the procedure is the same as that of the standard coned and threaded connection (see above steps 1 through 3) with the additional step below.
3. Once the Collet Body has been tightened to the appropriate torque value in the table below, the Collet Gland can be turned 1 - 1/4 turns past hand tight. This will compress the collet against the tube. After the initial compression of the collet, any additional retightening would only require 3/4 of a turn past hand tight.

The Coning and Threading Tool Kits:

Maxpro offers a complete line of coning and threading tool kits for manually coning and threading 1/4" O.D. to 9/16" O.D. tubing.

There are three different tool kit versions, "Medium" pressure, "High" pressure, and the "Complete Kit" that contains both the Medium and the High Pressure tools. All items are conveniently packaged in a sturdy hand carry tool case with removable top tray. The unique coning and threading tool design allows for interchangeability between components, eliminating multiple tool inventories.

The Coning and Threading Tool Kit contains:

- Coning Tool Assembly
- 1/4, 3/8, 9/16 Collets
- Collet Wrench
- 1/4, 3/8, 9/16 Cutting Blades
- Threading Tool Assembly
- 1/4, 3/8, 9/16 Guide Bushing
- 1/4, 3/8, 9/16 Threading Dies
- Allen Wrenches
- Complete Deburring Tool
- Suflo Cutting Oil
- Laminated Instruction Manual

5/16 X .062	152,000	5UM	CTK-5U (5/16 Ultra High Pressure Kit)	

Note: For additional coning and threading components see pages 2 and 3.

For Coning & Threading 9/16 Ultra High Pressure tubing (101,000 psi)
Maxpro recommends using the "Coning & Threading Machine" on page 8.

The Coning and Threading Machine

The Coning and Threading Machine is mounted on an industrial duty mobile cart which offers convenient and generous tool storage and a large chip collection/cutting oil system.

1-1/2" Capable Machine Now Available!

- Requires less operator training.
- Overall operation time is faster than other competitive machines.
- Selector knob allows the operator to "dial in" the tubing size to be coned and threaded. This automatically sets the correct thread length for faster set up.
- Coning blades are easily installed and manufactured from high quality hardened tool steel for long service life.
- Both coning and threading are done in sequential operations controlled by the single lever with handwheel assist. No need to remove the tube for each operation once tightened into the collet.
- Refer to Medium and High Pressure Valves Fittings & Tubing sections of our catalog for standard nipple lengths.
- Die head resets automatically after threading during the full retract stroke
- Safe operation - fully enclosed cabinet eliminates pinch points and the plexiglas cover protects the operator from cutting oil and metal chips.
- Cutting oil is filtered and returned to reservoir
- Removable chip drum for easy cleanup, with locking lid for secure, no mess shipping
- Overall Dimensions 31" W x 19" D x 44" H. Weight: 645 lbs. Shipping Weight: 847 lbs.
- Available for lease or purchase
- Right hand threading and tooling options available.
